A.M. TURING AWARD WINNERS BY...

**ALPHABETICAL LISTING** 

YEAR OF THE AWARD

**RESEARCH SUBJECT** 

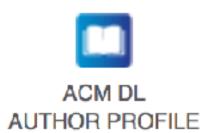

#### SIR TIM BERNERS-LEE

United Kingdom – 2016

#### CITATION

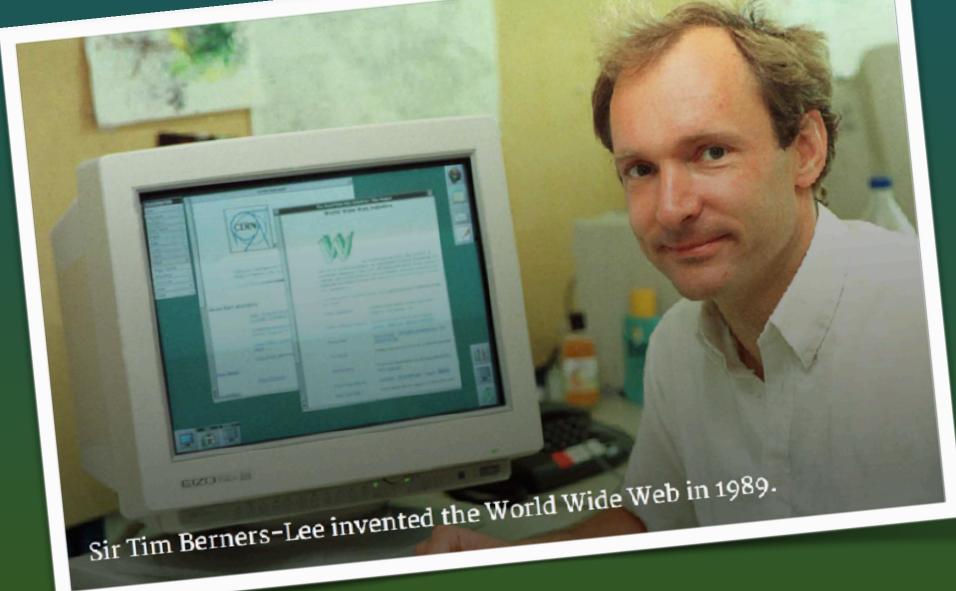

For inventing the World Wide Web, the first web browser, and the fundamental protocols and algorithms allowing the Web to scale.

## Web Resilience

The Web has never gone down since its inception in 1989.

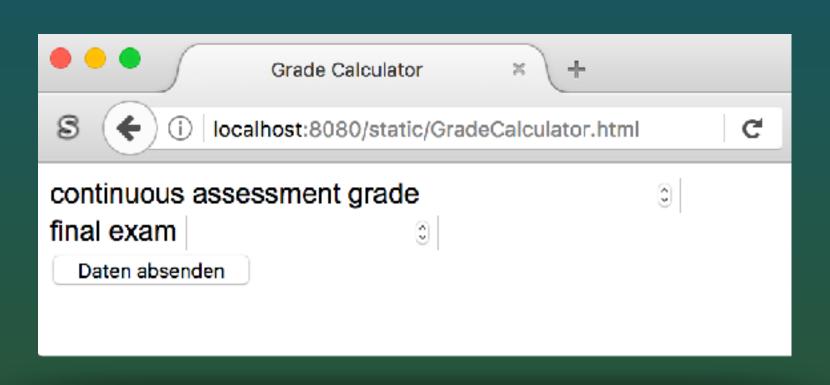

#### Web Resilience

BE RESTRICTIVE
WHAT YOU EXPOSE
BE TOLERANT
WHAT YOU CONSUME

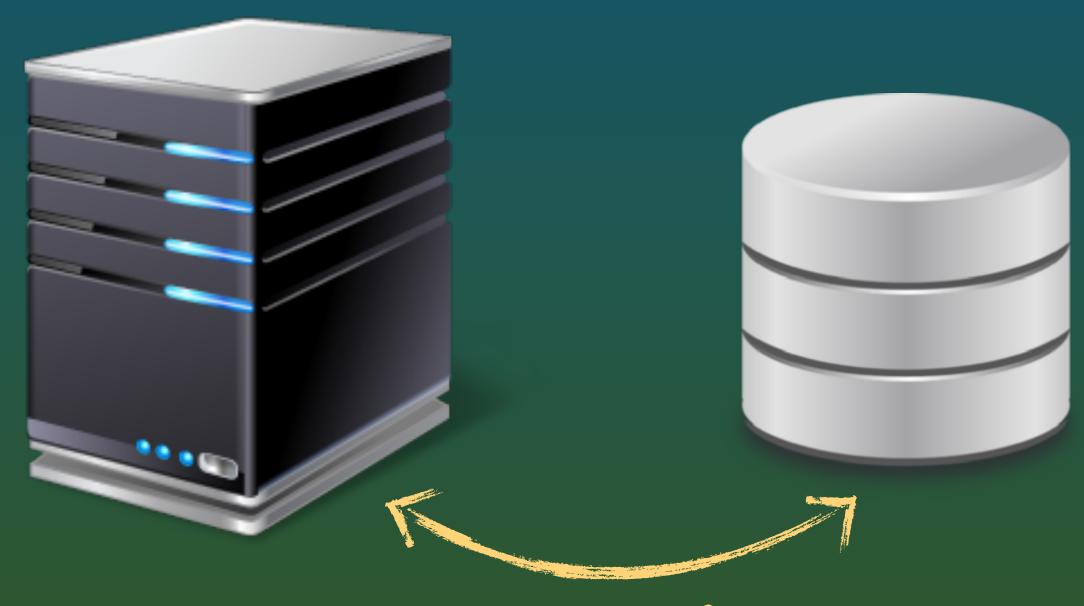

## Three Tier Web Applications

Client

Server

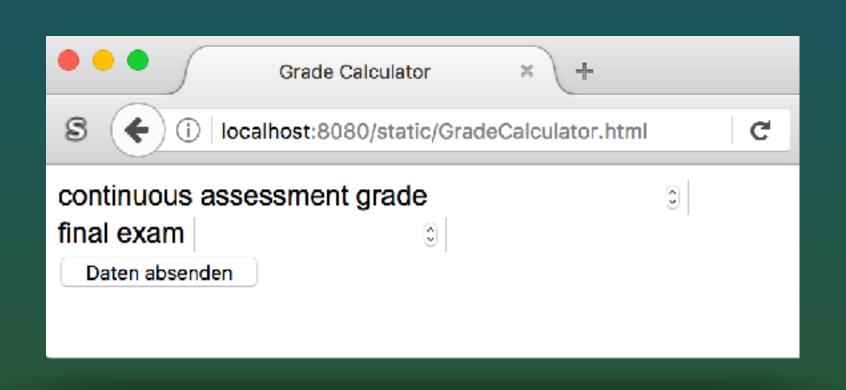

DB

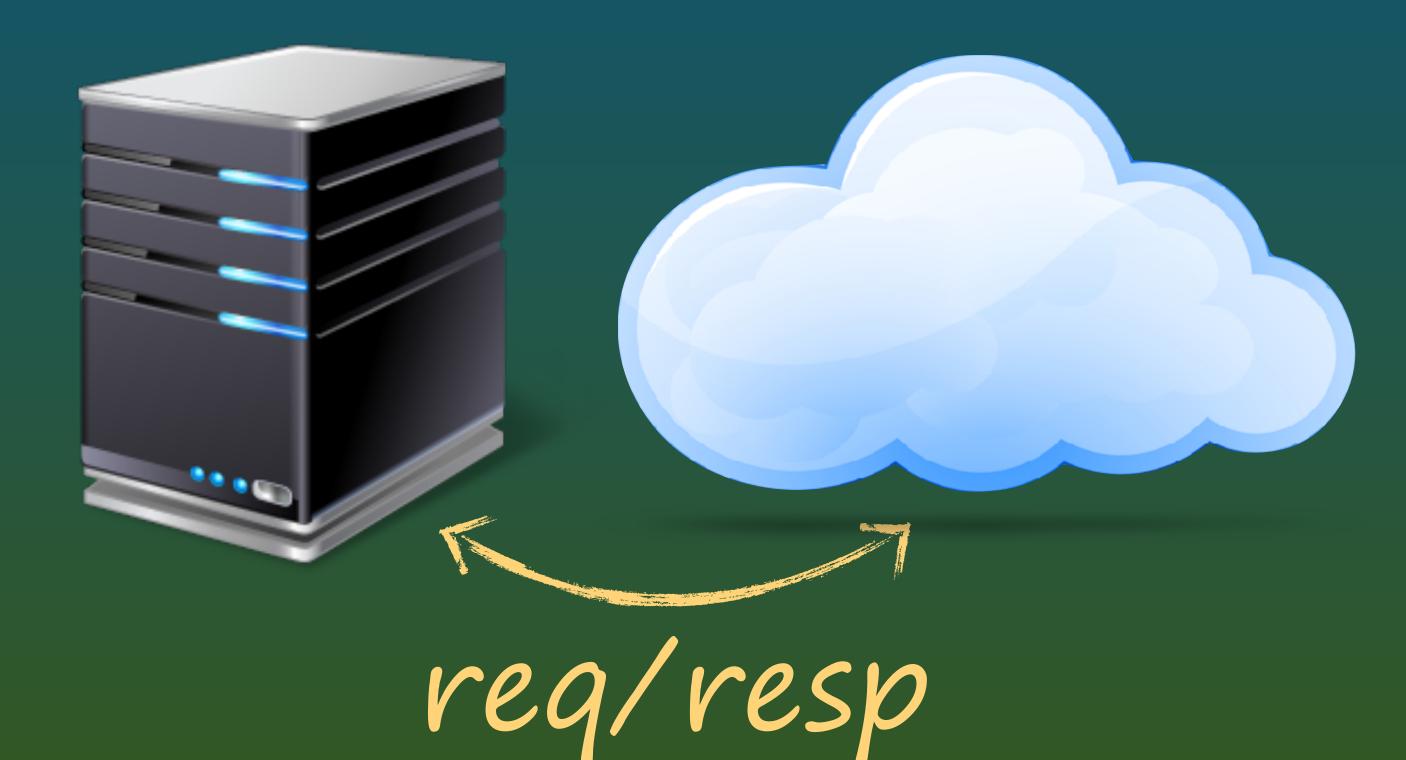

persist

#### Server with Service

Client

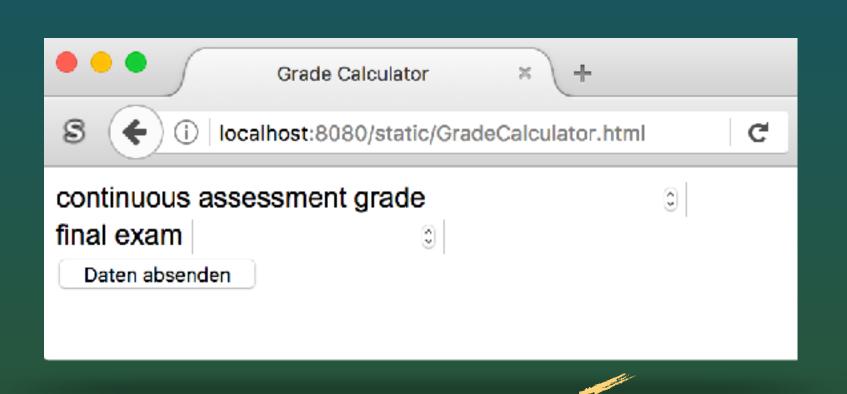

Server Service

### "Smart III" with Service

Client

Server

Service

req/resp

## JavaScript Service APIs

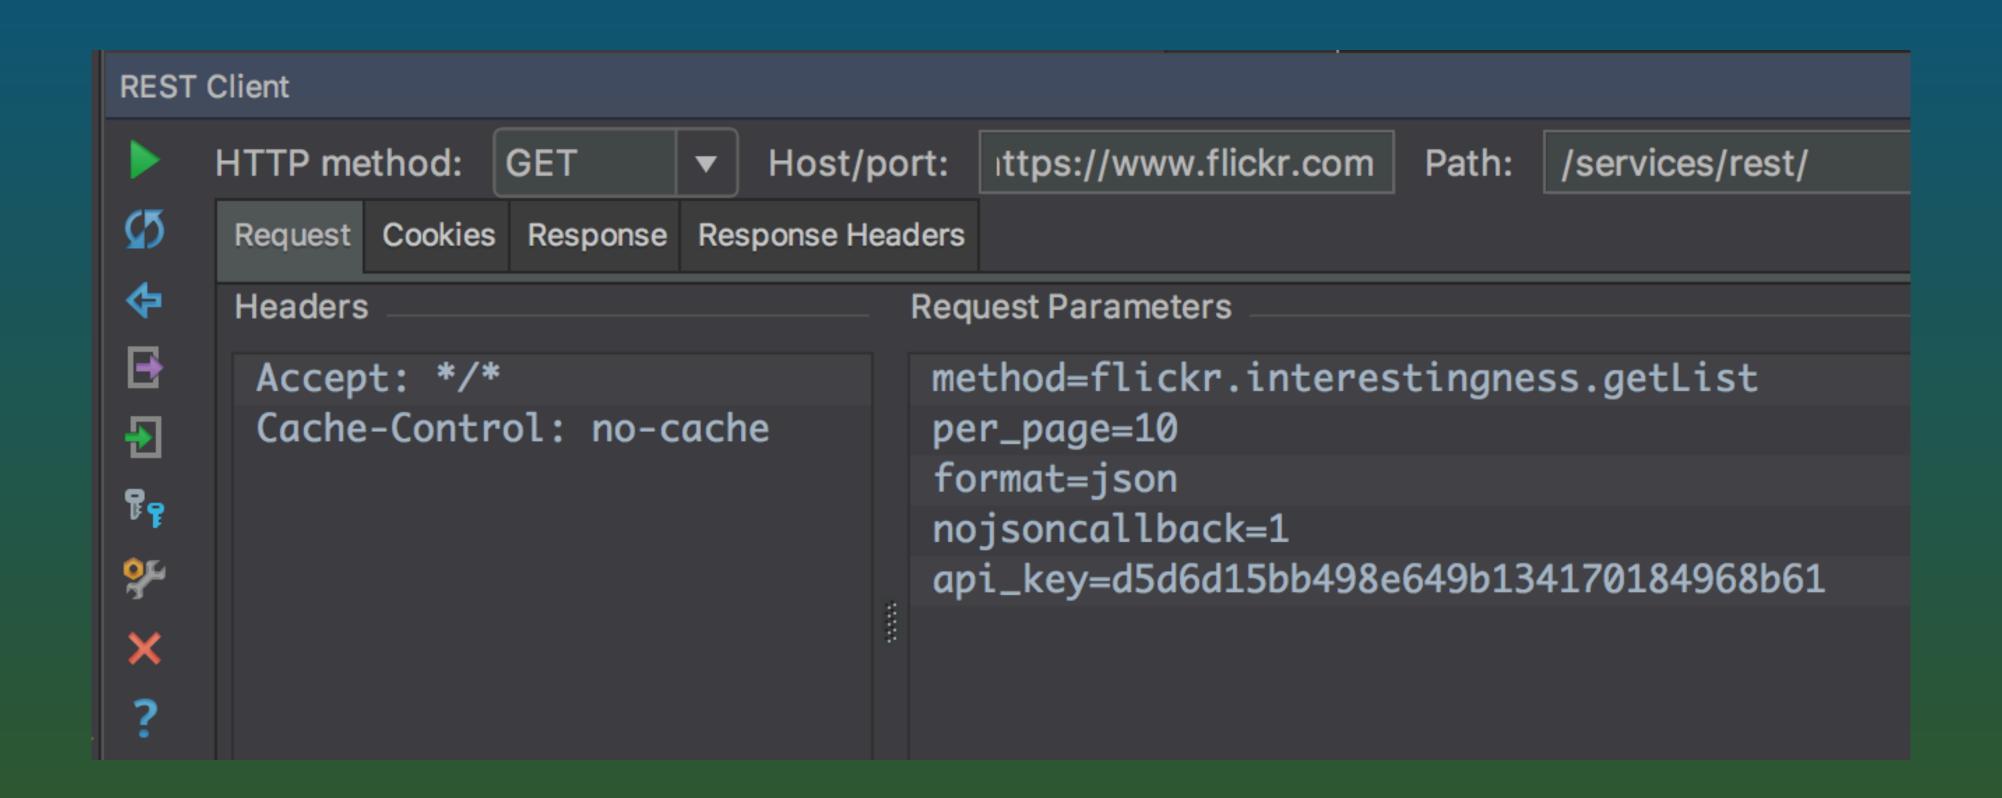

https://www.flickr.com/services/api/request.rest.html

Get a developer key (use mine carefully)

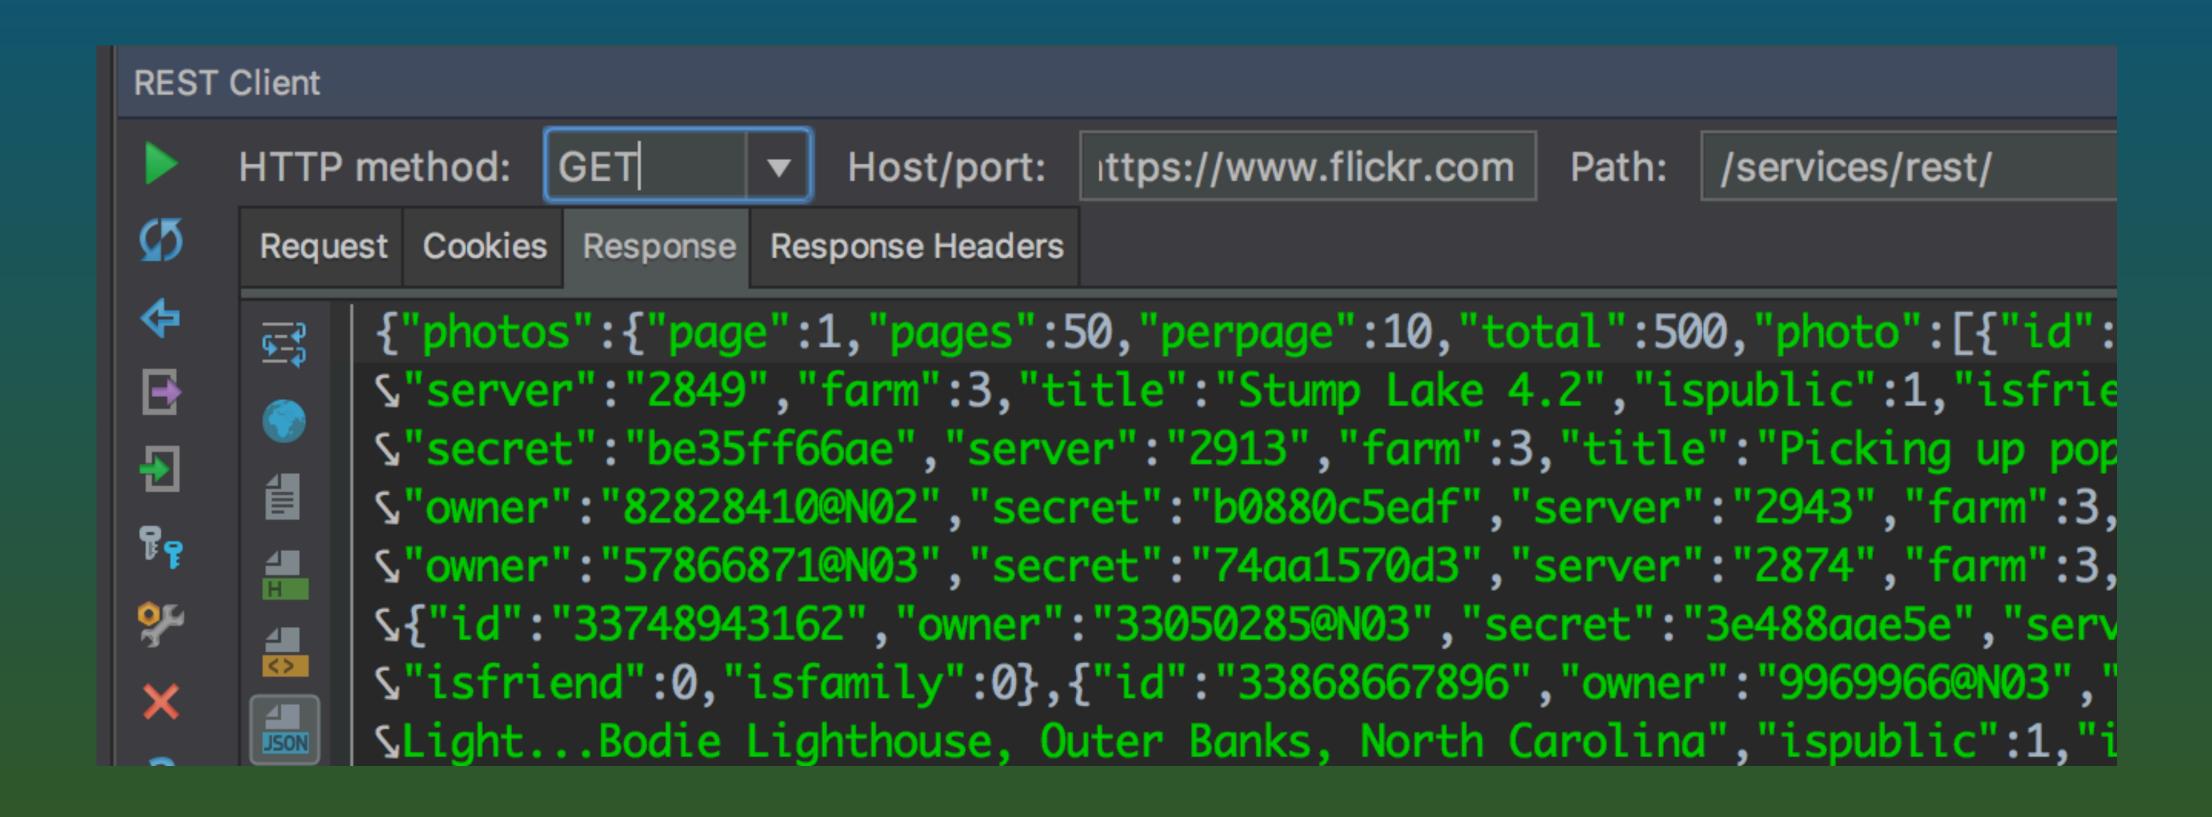

Use key to request a secret

Use secret to request a resource

## Integrated REST Client

#### Result

#### Result

```
{"photos": {
 "page":1, "pages":50, "perpage":10, "total":500,
   "photo"[ {
     "id":"33090986453",
     "owner": "1330589@N03",
     "secret": "5ce24df9f7",
     "server": "2849",
     "title": "Stump Lake 4.2"
```

#### Fetch Resource URL Pattern

http://static.flickr.com/ server-id/id\_secret\_m.jpg

#### URL

Uniform Resource Locator protocol, host, port, path, query, fragment

scheme:[//[user:password@]host[:port]][/]path[?query][#fragment]

# HTTP(s)

Hyper Text
Transfer Protocol
Very simple
Line/delimiter based

```
# First request
GET /quote?symb=YH00 HTTP/1.1
Host: www.example.org
HTTP/1.1 200 OK
Content-Type: text/plain;charset=UTF-8
15.96
# Second request 10 minutes later
GET /quote?symb=YH00 HTTP/1.1
Host: www.example.org
HTTP/1.1 200 OK
Content-Type: text/plain;charset=UTF-8
```

## HTTP Verbs

Verb	Change	Use
GET	No	Single or collective read, may be cached
PUT	Yes	Modify resource in place
POST	Yes	Create new resource
DELETE	Yes	Delete resource
HEAD	No	
OPTIONS	No	

#### REST

Representational State Transfer

- Resource addressing by URL
- Uniform operations by HTTP verbs
- Self-containment (no conversational state)
- Choice of format (XML, JSON, ...)

#### REST Issues

Easy to get started - easy to get lost.

Type safety, Versioning, Documentation

Addressing Operations as Resources

#### REST Alternatives

SOAP (WSDL),
CORBA (IDL),
EJB, \*-RPC, RMI,
local services

#### REST in Grails

http://docs.grails.org/latest/guide/webServices.html

Note the usage of @Resource in domain classes and "respond" instead of "render" in the controller actions.
